# Shared challenges across Europe and the world

Digital  
transformation

Sustainability

Competition

## Our vision

Global manufacturing innovation is led by Europe.

## Our mission

Bring together manufacturing actors across Europe to integrate innovation and education for an entrepreneurial and sustainable Europe.

# The strength of EIT Manufacturing

To ensure that innovations reach the market, industry has the right talent and entrepreneurs can thrive, EIT Manufacturing connects and integrates the areas of education, innovation and business creation and the Regional Innovation Scheme (RIS).

# Skills.move – Manufacture your future!

- The EIT Manufacturing **learning platform**
- Supports innovation & entrepreneurship education and the manufacturing industry to **upskill-reskill** the current and the future manufacturing workforces
- Provides **tailored learning experiences** avoiding big investments

## Why Skills.move?

**Topics identified**  
by the manufacturing industry for the manufacturing workforce

**Learning content**  
developed in partnerships of academia and industry

**Certificates of Completions**  
recognised by leading organisations

**Hands-on activities**  
to get valuable insights and skills by "doing"

# For whom?

Workers

Managers

Professors

Students

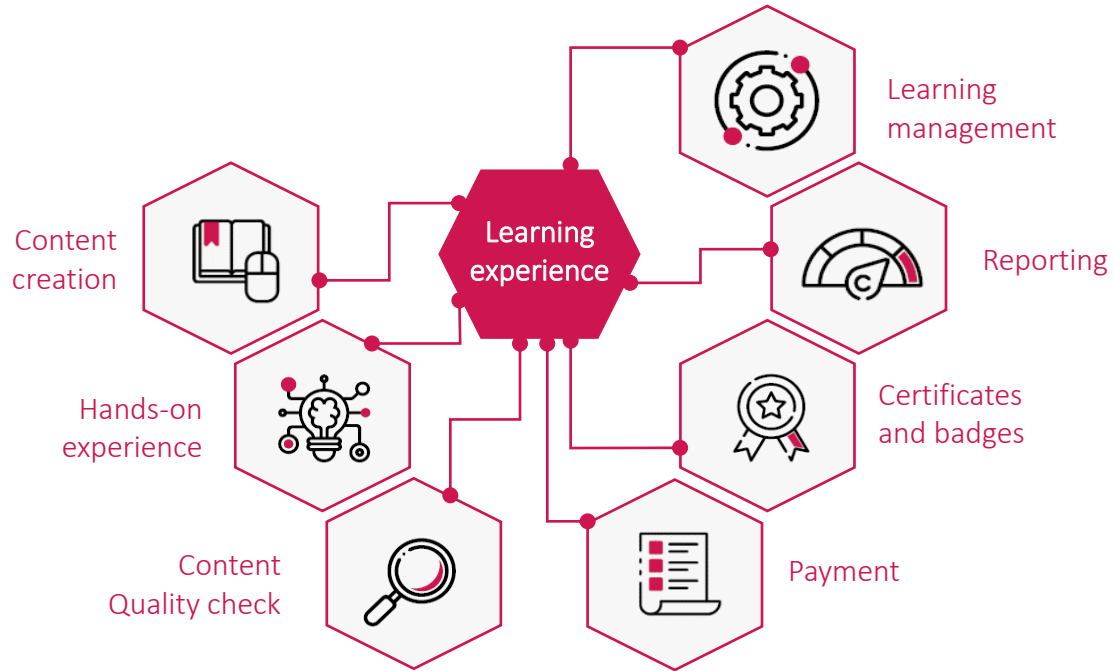

## Learners

Both the current and the future manufacturing workforces find training opportunities in Skills.move. The content is designed and categorized to address pupils, students, blue and white collars according to their respective level of knowledge in each of the topic of interest.

## Trainer

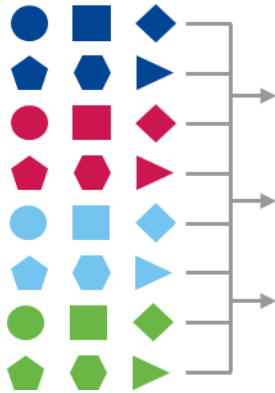

Skills.move is, as well, a ready-to-be-used tool for teachers, professors and manager leading an upskilling or reskilling training path for a group of people – for instance HR manager, business manager or training agencies. Skills.move offers to these personas a set of functionalities allowing management of learners' experience and monitoring of their progress and results.

# Learner-centric architecture

Only 100

- Industrial IoT
- Digital Twin
- Robotics 4.0
- Security
- ...

## Cyber physical production systems

# What's a Nugget?

Nuggets (learning unit) are **self-contained learning elements** composed by different kind of didactic media like videos, text, images, animations, AR/VR sessions and learning assessments to **achieve and to verify desired skills**.

Self-contained

Short (recommended 15,  $\leq$  30 min)

Addresses at least one skill

Based on learning outcomes

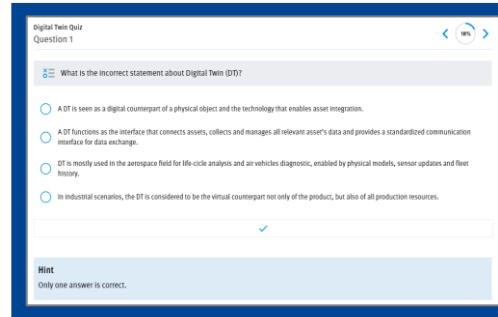

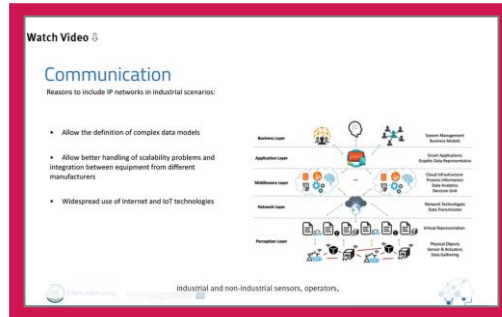

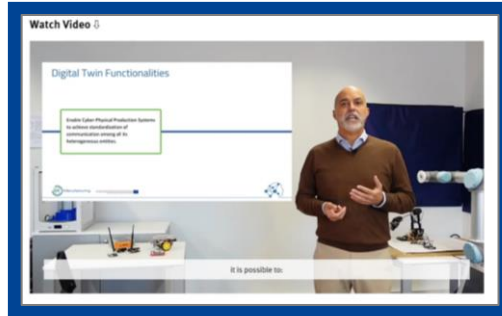

Interactive content to engage learners

# What's a Learning Path?

-  Made by at least 3 nuggets
-  Can combine nuggets developed by other project
-  Addresses at least one competence
-  Includes a final assessment (question nugget)
-  Based on learning outcomes

# Content available in different and adaptable formats

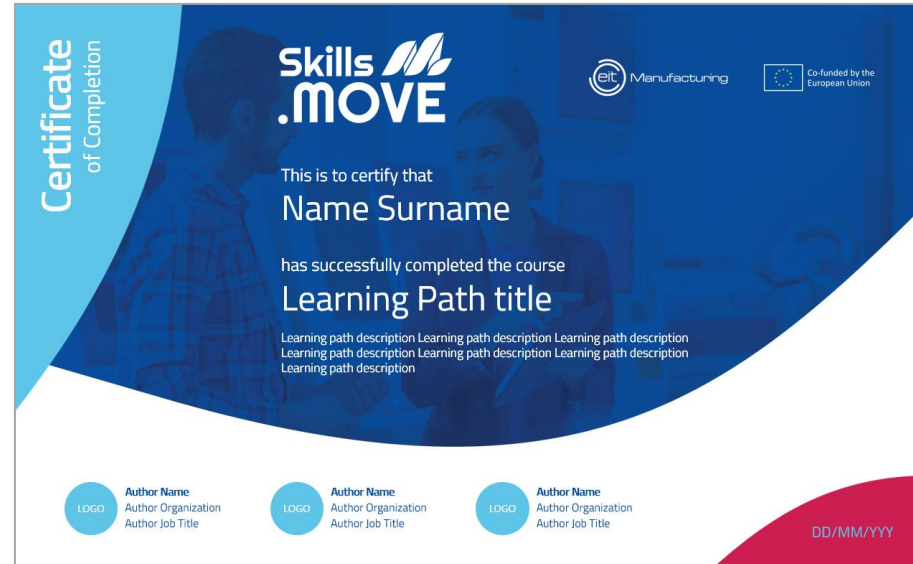

Easily adaptable formats for efficient learning:

- Teacher
- Simulation
- Video
- Slides
- Quiz
- Hands-on activities
- ...

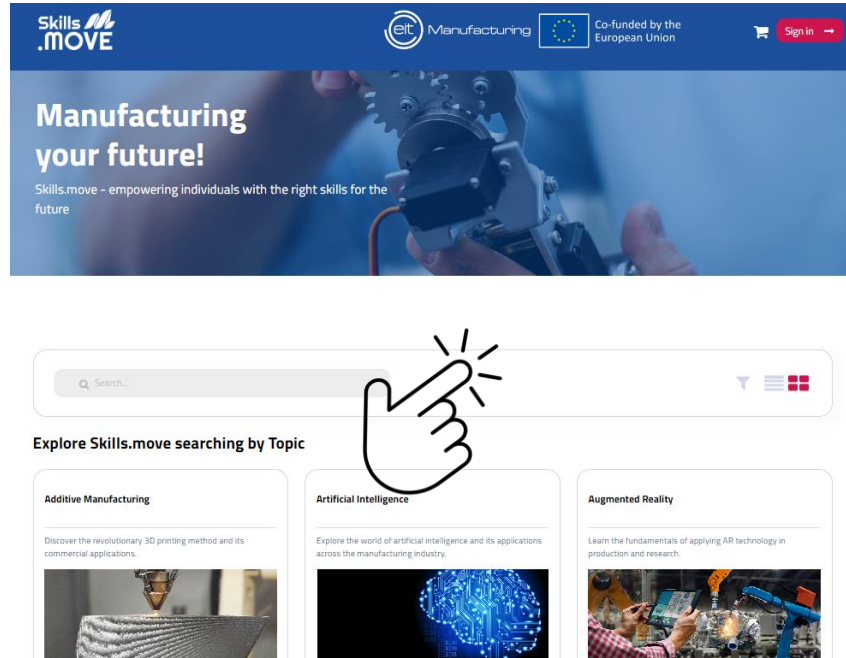

# Learning Paths and Certificates

The Learner receives the EITM labeled certificate if he/she successfully completes a Learning Path.

Each learning path ends with an assessment proving that the learner has achieved the expected learning outcome and has developed the respective competencies.
